

Alternate Design Configurations

A wearer may prefer one progressive lens over another based on their expectations and visual demands. **Apex Steady Progressive** lenses can be configured for patients' lifestyles.

Apex Steady Progressive | Near Vision

Ideal wearer: expert or novice progressive lens wearers who have visual demands that call for a larger more usable near area.

Apex Steady Progressive | Distance Vision

Ideal wearer: expert or novice progressive lens wearers who have visual demands that call for a larger more usable distance area.

Apex Steady Progressive | Intermediate Vision

Ideal wearer: first-time wearers, wearers who have experienced non-adapts with other progressive lenses, and those who have visual demands that call for a larger more usable intermediate area.

Apex Steady Progressive Lenses

Fully personalized free-form progressive lens with an advanced design that provides impeccable visual quality.

Apex Steady Progressive

One of the main advantages of free-form technology is it allows for the complete customization of lenses for each wearer. There are many personalized lenses on the market. They all seek to improve visual quality through customization. **Apex Steady Progressive** lenses are different.

Apex Steady Progressive lenses incorporate **Steady Methodology** to drastically reduce swim effect caused by lateral image distortion. Steady Methodology is a technological breakthrough in free-form, digital lenses. In addition to controlling for unwanted cylinder power, Steady Methodology addresses unwanted changes to mean power in the lateral areas of the lens. This improves peripheral visual acuity, reduces swim effect, and provides superior image stability and offers more comfortable vision.

Precise focus in the accommodative object space

IOT Digital Ray-Path 2 Technology adds the intelligent use of the wearer's own accommodation to optimize the lens for a range of focal distances. **Apex Steady Progressive** lenses have drastically reduced oblique aberrations across the entire visual field and offer the wearer greater comfort, impeccable visual quality, and more precise focus.

Ideal Wearer

Those looking for the best visual quality or who want the most innovative solutions. Digitally connected wearers looking for maximum visual comfort. Wearers with all types of prescription and addition powers.

Apex Steady Progressive | Standard Configuration

Features & Benefits

- Fully personalized progressive lens
- Near, distance, & intermediate enhancements available
- Technologies: IOT Digital Ray-Path® 2, Steady Methodology
- Precise & comfortable focus for all working distances in any direction of gaze
- Near elimination of peripheral blur
- Superior visual quality for viewing digital devices
- Higher image stability for reduced swim effect
- Improvement of peripheral visual quality in the distance zone
- Compatible with virtually any lens material & coating
- MFHs: 14, 15, 16, 17, & 18 mm or variable
