

SL Custom® isn't just a device. It's an entire ecosystem designed to revolutionize the eyewear experience. Using virtual reality goggles, **SL Custom®** evaluates a patient's gaze dynamics for all visual distances, delivering unparalleled precision. **SL Custom®** changes the paradigm of how presbyopes see the world as it detects how they look and adapts the lenses to them instead.

1 Features

1. **Gaze Analyzer Technology:**
Aligns lenses with natural gaze patterns, removing restrictions of traditional lenses.
2. **Morphing Technology:**
Combines prescription and gaze dynamics to create uniquely custom-made glasses.
3. **Gaze Maps:**
With SL Custom® goggles, we obtain 3 maps representing the 3 vision distances: far, intermediate and near. This way, we obtain a 3D representation of the gaze dynamics for each patient.

2 Key Benefits

FOR ECPs

- Enhanced In-Store Experience.
- Increased Foot Traffic.
- Sales tool easy to understand and manage.

FOR CUSTOMERS

- Personalized Lenses.
- Maximum visual acuity.
- End-user is involved in the process of creating their lenses.

3 Target

Designed for perfectionists and visionaries who expect excellence and embrace innovation. Technology lovers engaged by advanced products.

In office environments, users often demand greater visual comfort and ergonomics to enhance their vision when using different screens and devices. That's where **SL Custom® office** comes in, as the first office lens where the user customizes the work environment.

1 Features

Main technologies:

1. Gaze Analyzer Technology:

As in **SL Custom®**, **SL Custom® Office** studies the user's gaze dynamics but in this case in a customized work environment. The technology calculates the optimum distance according to the work environment configuration and the SL Custom® office map.

2. ErgoPath Technology:

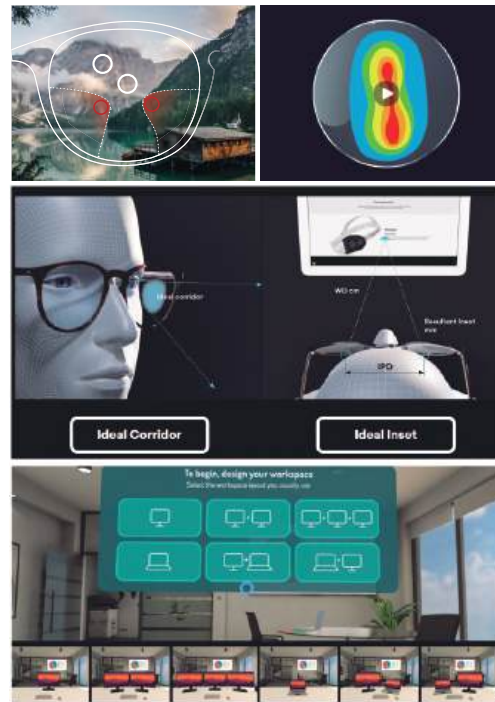

It ensures convergence and ergonomically optimal visual posture for each patient.

3. Maximum focus far distance:

Regression zone is included at the top of the lens to provide maximum focusing far distance.

4. SL Custom® office:

It provides to the patient the office lens that best suits their work environment.

2 Key Benefits

FOR ECPs

- High conversion rate.
- A sales tool that boosts a second pair of glasses.
- Innovation in visual solutions and new shopping experience.

FOR CUSTOMERS

- Impressive and immersive experience.
- Enhances the understanding of the product.
- End-user is involved in the process of creating their lenses.

3 Target

Presbyopes that use multifocal lenses and look for a specific visual solution during working hours.
